

D-Link ISO 14000

Environment Policy Announcement

D-Link, a specialized computer network company, responds the global environmental protection tendency and the call for social responsibility by promoting an environment protection consciousness, establishing a green enterprise mission and carrying out sustained environment protection measures.

D-Link pledges to:

- Conform to all legal requirements and other requirements related to the protection of the environment
- Minimize adverse impacts to the environment
- Promote green products
- Save energy and scarce resources
- Take preventive actions to protect the environment
- Maintain a safety-first and health-first policy for employees

D-Link will educate its employees, consider and respond all its internal & external opinions to ensure that the environment quality is maintained.
